PUBLIC MEETING VILLAGE OF CARROLL SANITARY SEWER PHASE III PROJECT

INTRODUCTION: Project Owner Village of Carroll **740-756-4031**
Contractor JLD Construction Services LLC., Columbus, Ohio **614-526-0882**
Engineer & Contract Coordinator DLZ Ohio, Inc., Logan, Ohio **740-380-2828**

GOAL: To preserve the health, safety and welfare of the residents in the Village by providing gravity sanitary sewer to address the failing on-lot pumps of the pressure system.

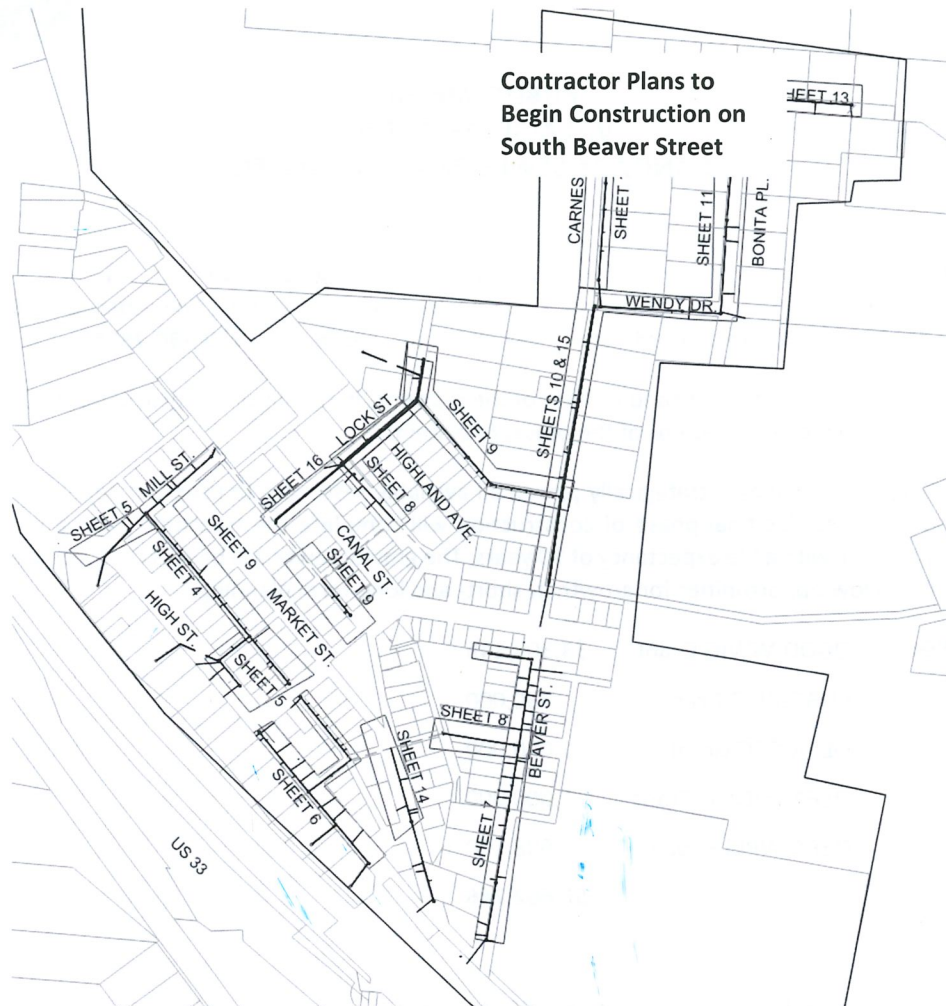

PLAN: The Village of Carroll has strategically placed all available resources to keep our collection system affordable and sustainable. This final phase of construction will complete the transition from a pressure system to a gravity system, with a life expectancy of 50 years. The gravity sewer will be less costly to operate and maintain, as well as allow opportunities for growth in short- and long-term planning.

PROJECT FUNDING:	ODOD-WWIG Grant	\$3,304,146
	CDBG-RPIG Grant	750,000
	OEPA-OSG Grant	1,000,000
	OEPA-H2Ohio Grant	1,000,000
	OEPA-WPCLF Loan	608,100
		\$6,662,246

MONTHLY RATES: Current Rate Structure to remain in place

CONNECTIONS: The installation of a gravity system will require you to abandon the grinder pump in your yard and run a 4-inch gravity line to the right of way. This can be accomplished in a couple of ways. Either intercept the existing sewer line running to your grinder pump or you can reroute the plumbing under your house and come out the front of your house. An estimated cost to complete this work would be between \$15 - \$30 per linear foot of lateral. There are potential grant funds available for those who qualify.

PROPOSED SCHEDULE:	Public Meeting	June 2025
	Begin Construction	July 2025
	Construction Complete	August 2026
	Start Connections	Fall 2026
